

SONY

Welcome to the new era for Home Cinema

Home Cinema Projector 2022

Immersive entertainment with Sony native 4K SXR™ laser projectors that deliver high brightness and true 4K HDR imagery in a compact design.

VPL-XW7000ES

VPL-XW5000ES

3,200 lumens of dazzling brightness

Immerse yourself in the large scale action with bright and bold images. The VPL-XW7000ES is 60% brighter than the VPL-VW790ES, engineered with our newly developed Native 4K SXRD™ (Silicon X-tal Reflective Display) panel and Wide Dynamic Range Optics.

It delivers 200 nits* on a 150-inch screen—bringing you a truly immersive experience.

*Screen Gain 1.2

Live Colour Enhancer*

With the newly developed Live Colour Enhancer, you'll enjoy lifelike skin tones and vivid images. The Live Colour Enhancer selectively expands the colour gamut, for vivid HDR images without unnatural oversaturation. Whether you're watching in daylight or a dark room, you can count on vibrant, true-to-life colours.

*VPL-XW7000ES only

New innovative technologies deliver a more immersive viewing experience with extreme clarity, expanded dynamic range and expanded colour volume

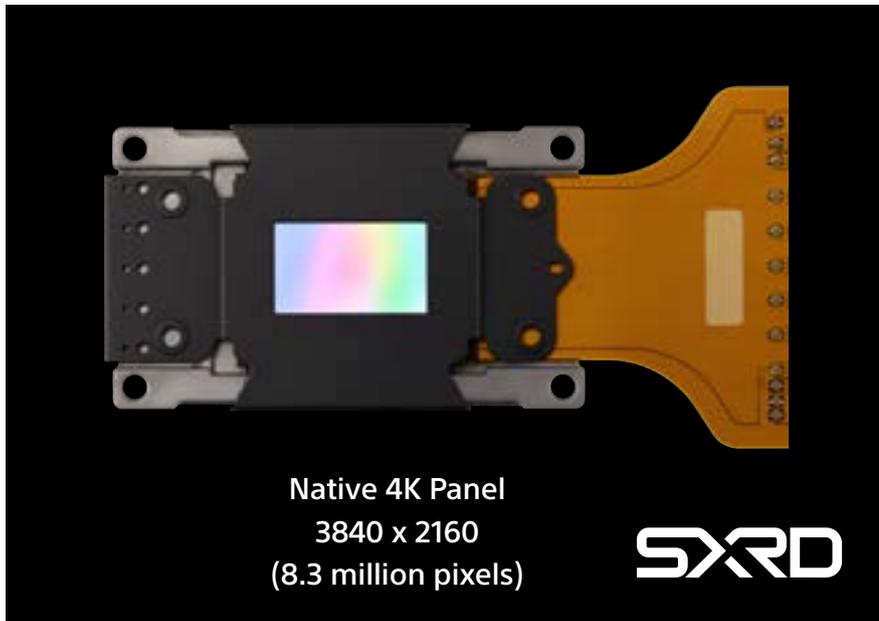

Extreme clarity

Expanded dynamic range

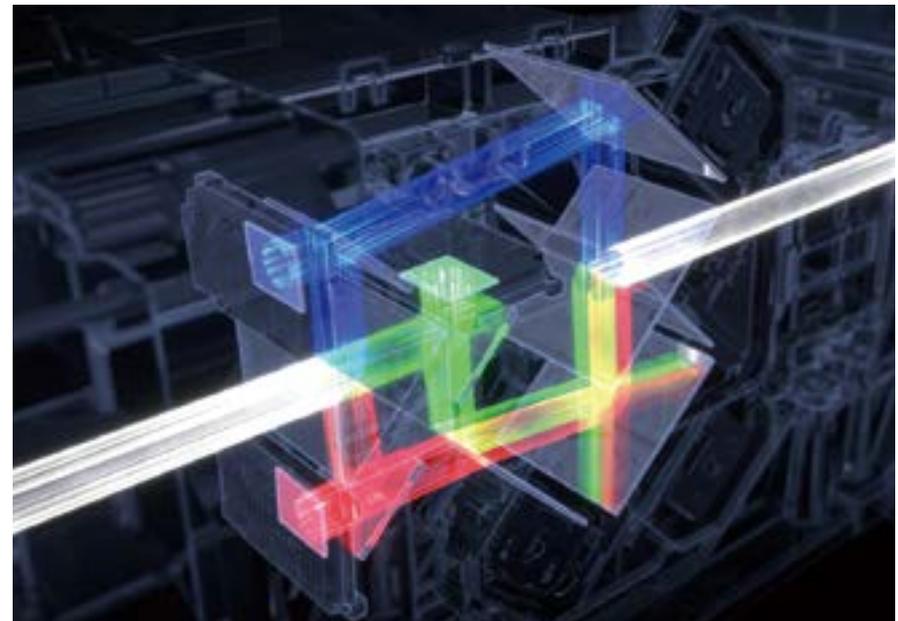

Expanded colour volume

All-new Native 4K SXR™ panel

Immerse yourself in an incredibly lifelike picture with native 4K that offers 8.3 million pixels (3,840 x 2,160).

With an all-new 0.61-inch SXR panel, you'll enjoy high brightness, inky blacks, vibrant colours, rich tones and textures, plus clear cinematic motion and image smoothness.

All-new Wide Dynamic Range Optics

Our new Wide Dynamic Range Optics contribute to a compact design with better light control by maximising the potential of the laser light source.

The resulting higher colour volume means naturally colourful images, even at high brightness levels, and stunning contrast.

Flagship-level X1™ Ultimate for projector

X1 Ultimate for projector optimises our acclaimed BRAVIA TV video processing for projection.

The incredible power of this video engine enables advanced data processing, with real-time enhancement of each on-screen object.

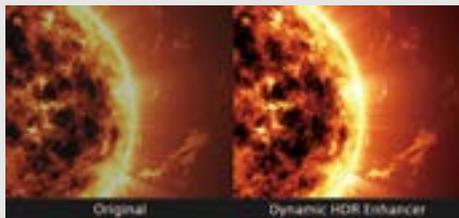

The result is high dynamic range imagery with texture, colour, contrast and realism only available from Sony's home cinema projectors.

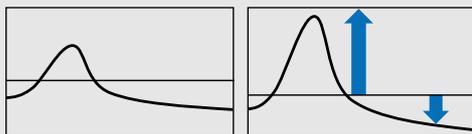

Simulated images

Object-based HDR Remaster

Object-based HDR Remaster analyses the colour of individual objects on screen and adjusts the contrast, resulting in more realistic pictures with greater depth and texture.

Simulated images

Dynamic HDR Enhancer

Dynamic HDR Enhancer processes HDR content scene by scene and enhances the contrast in combination with laser output control—bringing you bright 4K HDR images.

Simulated images

Object-based Super Resolution

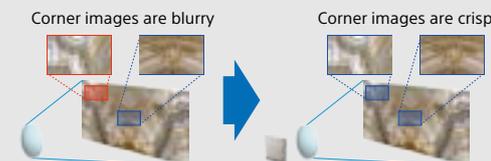

Object-based Super Resolution technology detects individual objects in a picture and enhances each one for exceptional accuracy and detail.

Simulated images

Dual Database Processing

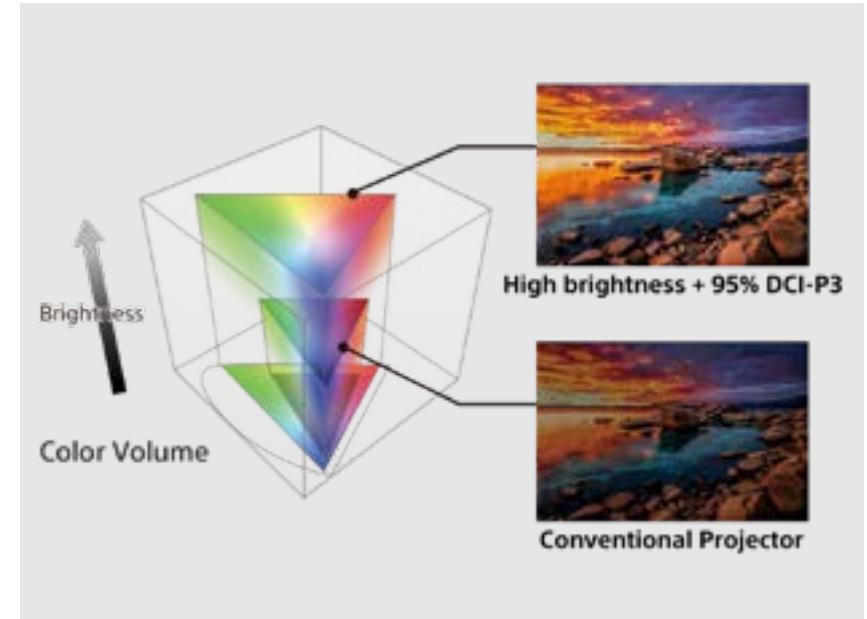

Two powerful image improvement databases work together to improve picture quality in real time. One database helps reduce on-screen noise, while the other is used to upscale the resolution.

Precompensate by Digital Focus Optimizer

Digital Focus Optimiser

By analysing every pixel and detecting possible degradation in advance, the Digital Focus Optimiser corrects the image quality so that the focus is better than ever, even in the corners.

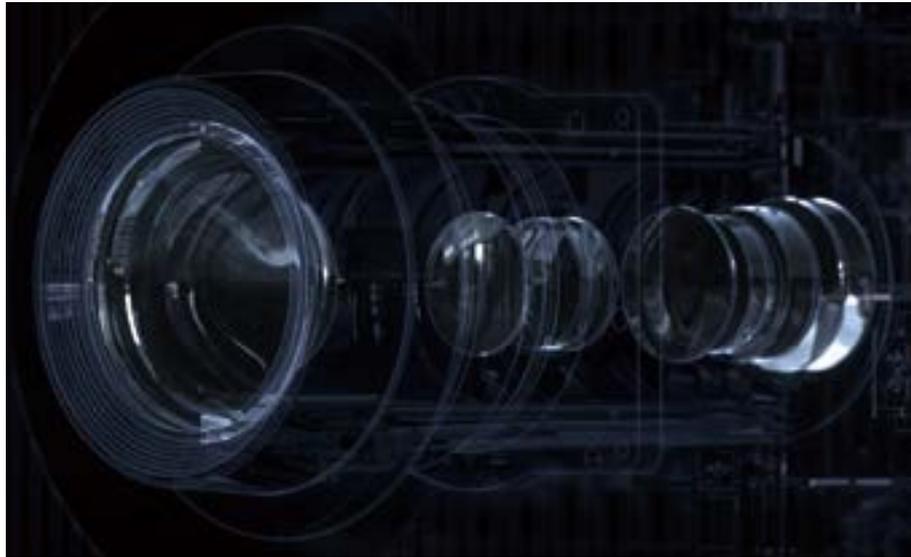

True-to-life colours with TRILUMINOS PRO™

See over a billion colours come to life with TRILUMINOS PRO. Our unique TRILUMINOS PRO algorithm can detect colour from saturation, hue and brightness to reproduce natural shades in every detail. You'll enjoy colours that are closer to those seen in the real world.

Wide colour volume

Enjoy spectacular brightness and stunning realism, thanks to new Wide Dynamic Range Optics that achieve a 95% DCI-P3 wide colour gamut.

All-new Advanced Crisp-Focused (ACF) Lens*

Experience flawless clarity across the entire screen, thanks to our Advanced Crisp-Focused Lens. The 70-mm aspherical front lens widens the focus area, ensuring clear images from corner to corner. A floating focus system utilises two moving lens groups and extra-low dispersion glass for distortion-free images with accurate colour reproduction.

*VPL-XW7000ES only

IMAX
ENHANCED

Make the home cinema experience bigger and better than ever

Sony 4K projectors are compatible with IMAX Enhanced content, making them ready to deliver the bigger, more breathtaking IMAX visuals you love in compatible content. Take advantage of the size of your projector screen with movies that become even more immersive with IMAX Enhanced.

World's most compact native 4K laser projector*

We've designed the VPL-XW5000ES to be even smaller and lighter than its predecessors by developing the all-new Native 4K SXRTMD panel and compact Wide Dynamic Range Optics. This laser projector is about 30% smaller in volume and about 35% lighter than the VPL-VW790ES, delivering the same high brightness.

*As of April 2022, according to research by Sony Corporation in the native 4K projectors market.

Home Automation Systems

Remote Monitoring Services

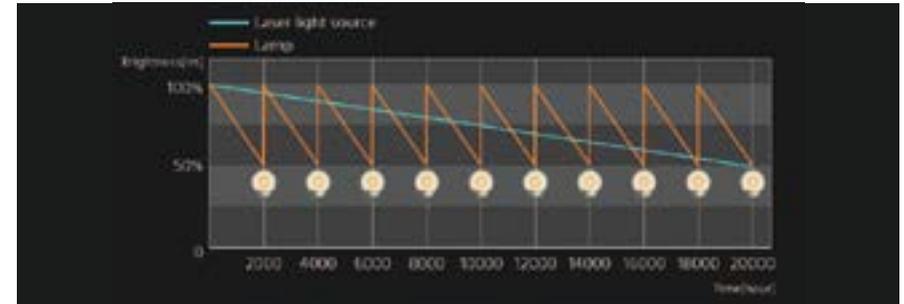

OvrC domotz

A smart addition to your smart home

Integrate your 4K projector into your home automation and remote monitoring systems. The projector supports Control4, Crestron, Savant and AMX, as well as OvrC and Domotz—so you can enjoy a smarter, more convenient entertainment experience.

Designed with the environment in mind

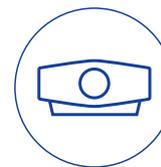

This 4K projector is full of bright ideas—not only for your home entertainment but also for a sustainable future. To reduce our footprint, we created a mercury-free design with a laser light source. We also reduced the amount of virgin plastic used in the main body by more than 25% and the packaging materials by more than 15% compared to the VPL-VW790ES.

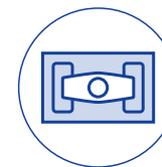

Enduring brightness from a laser light source

You'll never have to worry about changing the lamp in your home cinema projector—no lamp replacement and virtually no maintenance are required.

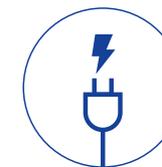

The projector uses an ultra-pure and reliable laser light source, which lets you enjoy perfectly clear 4K pictures at optimal brightness for up to 20,000 uninterrupted hours.

Other Features

VPL-GTZ380/XW7000ES/XW5000ES

4K Motionflow™

Without Motionflow

With Motionflow

Simulated images

The powerful video processor in the projector offers Motionflow for smooth and clear motion, even when viewing 4K content.

Motionflow is ideal for fast-moving sports content, as it adds frames to reduce blur while maintaining brightness.

Cinema purists can choose True Theatre mode to retain the original 24 fps.

VPL-GTZ380/XW7000ES/XW5000ES

Input Lag Reduction

Off

On

Simulated images

Enjoy the latest games lag-free on the big screen. All of our 4K projectors include input lag reduction that enables the player's input to be reflected on screen without delay.

The projector supports 4K 60 Hz input with an input lag under 21 ms, and 2K 120 Hz input with an input lag under 13 ms.

VPL-GTZ380/XW7000ES

Picture Position Memory

Store focus, zoom and lens-shift settings for up to five screen formats for easy recall. Picture Position Memories store key settings so you can quickly watch movies in the ideal format. Match aspect ratios, including 16:9 and Cinemascope, and store these settings in your 4K projector.

VPL-GTZ380/XW7000ES

Motorized zoom lens and wide lens shift

Installing your 4K laser projector in any room is easy with a motorized zoom and a wide lens shift range. Adjust the image position vertically and horizontally for the perfect setup whatever your room size.

VPL-GTZ380/XW7000ES/XW5000ES

Anamorphic lens compatibility for 4K signals (V-stretch for 4K)

Wide lens compatibility means you can use your legacy anamorphic lenses with ease, even with 4K content.

Watch your content in your favorite formats with a full-size picture, thanks to the V-stretch function.

Bright, immersive entertainment from a native 4K laser projector

2022 NEW
